

YUVRAJ SINGH

Senior Software Developer | Java Microservices | MuleSoft | Workato | Kubernetes
Gurgaon, Haryana | 7011219926 | yuvraj14yadav@gmail.com

PROFESSIONAL SUMMARY

Senior Software Developer with 10+ years of experience in Java/J2EE, Spring Boot, Microservices, Enterprise Integrations, and Telecom domain solutions. Strong expertise in scalable distributed systems, Salesforce connector development, Kafka-based event-driven architectures, Kubernetes deployments, and Workato automation platforms. Experienced in driving large-scale API modernization, improving application scalability, reducing platform latency, and enhancing production observability using centralized logging and monitoring solutions.

TECHNICAL SKILLS

Java/J2EE, Spring Boot, REST & SOAP APIs, Microservices, Kafka, Hazelcast, Salesforce Connector Development, Workato, MuleSoft, Kubernetes, Helm Charts, Docker, Oracle SQL, Git, Jira, Confluence, Maven, CursorAI, Greylog

MANAGEMENT SKILLS

Team Leadership & Mentoring, Cross-functional Team Collaboration, Stakeholder Management, Agile & Scrum Methodologies, Project Coordination & Delivery, Production Support & Incident Management, Client Communication & Onsite Coordination, Requirement Gathering & Solution Design, Release & Deployment Management, Task Prioritization & Ownership

PROFESSIONAL EXPERIENCE

Deutsche Telekom (DTDL) – Senior Software Developer | May 2022 – Present

- Designed and maintained scalable Java Microservices handling telecom broadband and customer provisioning workflows with high availability and enterprise-grade reliability.
- Implemented **Hazelcast** distributed caching in the SACO (Salesforce Connector) platform, **reducing repeated database/API calls by ~40%**, improving application scalability and overall system performance.
- Resolved critical Salesforce Platform Event processing issues in SACO integrations, **reducing platform event failures by 30%**, improving event reliability and stabilizing downstream telecom workflows.
- Led enterprise API migration initiatives from MuleSoft to Workato, **reducing operational complexity by consolidating 15+ integrations**, lowering maintenance overhead and licensing costs.
- Implemented Greylog centralized logging and monitoring for Workato integrations, enabling faster root cause analysis, enhanced observability, and proactive production issue tracking.
- Worked on Workato On-Prem Agent (OPA) deployments and maintenance using Kubernetes and Helm Charts, **improving infrastructure scalability and reducing manual deployment effort by ~50%**.
- Implemented Kafka-based asynchronous messaging architecture in Java Microservices, **improving event throughput by ~45%** and enabling scalable, decoupled communication across services.
- Managed deployments across multiple environments using Kubernetes, Helm Charts, and CI/CD pipelines, **reducing deployment downtime by ~60%** and ensuring smooth production rollouts.
- Owned and maintained multiple business-critical Java Microservices, including feature enhancements, production support, scalability improvements, and performance optimization.
- Utilized CursorAI to accelerate development, debugging, and automation activities, **reducing average development cycle time by ~25%** across enterprise integration projects.

CIENA – Senior Software Developer | Dec 2018 – May 2022

- Worked on Network Management System (NMS) implementation using Java Microservices architecture for telecom network provisioning and monitoring solutions.
- Developed and enhanced scalable backend services using Java 8, Spring Boot, REST APIs, and distributed system design principles.
- Replaced licensed JWS technology with **OpenJWS open-source integration**, eliminating vendor licensing costs and streamlining application deployment and environment setup using Install4j installers.
- Migrated enterprise applications from **Commercial JDK to OpenJDK (Java 8)**, driving significant licensing cost reduction, improving platform compatibility, and optimizing long-term operational expenditure.

Newgen Software – Software Developer | Aug 2015 – Sept 2018

- Developed and customized banking workflow solutions for Account Opening, RLOS (Retail Loan Origination System), and CLOS (Corporate Loan Origination System) using Newgen BPM platform.
- Designed and implemented business process workflows, forms, integrations, and backend logic for enterprise banking clients.
- Worked extensively on Java/J2EE, Oracle SQL, REST/SOAP integrations, and workflow automation for banking process digitization.
- Handled onsite implementation and client coordination with Bank Audi Lebanon for banking workflow deployment and support activities.
- Managed SIT, QA, and UAT sign-offs for banking workflow implementations, ensuring successful delivery and defect-free production releases.
- Provided production support, issue analysis, bug fixing, and performance optimization for critical banking applications.
- Collaborated with business analysts, QA teams, and client stakeholders to gather requirements and implement process improvements.
- Participated in deployment, environment setup, and release management activities across development, testing, and production environments.

EDUCATION

B.Tech in Computer Science – ITM University (2011–2015)
